

## Socomec receives Frost & Sullivan Award 2015 for its technological leadership in its UPS equipment

Benfeld, the 8 January 2016

*For the eighth time since 2003, Frost & Sullivan has again awarded Socomec for the excellence of its technology implemented in their UPS equipment. The prize is given based on a comparison of the leading UPS manufacturers around the world.*

### Technology that end users can trust

As it has done every year since it was set up in 1961, the independent strategy consulting firm Frost & Sullivan carries out international market research of competing companies in a wide range of sectors and technologies and assesses their respective performance in different fields: leadership, technological innovation, customer service, the development of strategic products, etc.

The conclusions made by F&S in its 2015 survey report couldn't be clearer: "Since its foundation, Socomec has continued to develop the technology used in its UPS whilst always ensuring that its innovations remain focused on the benefits for users."

Socomec is therefore proud to have received this latest recognition that rewards its continuous investment in R& D and its ability to offer an extensive range of products adapted to market requirements and the needs of its customers for high performing, economic and scalable solutions.

Take for example the latest range of modular Green Power DELPHYS Xtend UPS that have been specifically designed for large data centres.

This is a high-performance, fully scalable range based on 200 kW power blocks that can be progressively integrated to provide power output of up to 1200 kW. This flexibility provides many advantages for data centre operators by allowing progressive management of additional power investment and the reduction of operating costs.

### A long list of awards:

This latest award extends the list of honours Socomec has received from Frost & Sullivan over the years:

2003 and 2004: Awards for excellence in customer service

2006: Award for product innovation

2009: Award for the best product range strategy for its UPS offering

2011: Award for product innovation

2013: Award for the differentiation of its UPS product offering

2014: Award for European company of the year in the UPS sector

2015: Award for the technological leadership of its UPS

---
