**NETYS PL**

**User-friendly multi-socket protection**
600 and 800 VA

### An innovative solution and superior design
- Compact and practical pluggable power protection integrating a larger number of sockets adapted to computer and IT peripherals in small office and home office environments, facilitating connection and tidier cabling.
- Modern design suitable for positioning over/under the desk or floor installations.
- Complementary USB port on the top for recharging mobile devices (e.g. phones, MP3, etc.).

### Easy to use
- Operating mode indicated by means of the smart LED indicator lights.
- Easy battery maintenance and replacement.
- Integrated mains input cable on the side, allowing all six sockets to be used.

### Adapted protection to meet all your needs
- 6 output sockets (British, French or German/Italian standards) for easy distribution directly to your applications:
  - 4 sockets protected against power cuts and overvoltages, aimed at your most sensitive applications (professional desk top systems, workstation and monitors). The back-up time (up to 30 minutes) enables standard PC tasks and configuration to be saved.
  - 2 sockets protected against overvoltage alone for use with less critical applications and high absorption consumers (e.g. laser printers).

---

**The solution for**
- PC: LCD or CRT monitors, scanners, printers, etc.
- Cash registers
- Interactive terminals

**Technology**
- VFD "offline"

**Certifications**
- RoHS COMPLIANT
